Amendment

Sir:

In response to the Office Action dated April 5, 2002, please amend the above-identified application as follows:

In the Specification:

Please replace the paragraph at page 4, lines 24-29 with the following:

B1  
Within the drawings, Fig. 1 is an alignment of domains E and F of the protein shown in SEQ ID NO:2 with the Kunitz domain of human alpha 3 type VI collagen ("1KNT"; SEQ ID NO:3). Figs. 2A-2J are a Hopp/Woods hydrophilicity profile of the amino acid sequence shown in SEQ ID NO:2. The profile is based on a sliding six-residue window. Buried G, S, and T residues and exposed H, Y, and W residues were ignored. These residues are indicated in the figure by lower case letters.
